Css	Firebase
Docker	Prisma

Seeking for a position to build my career that would help me in achieving greater practical excellence in the Software developing industry, exceptional with a great attitude, problem solving and hardworking nature, who can contribute any project or company as a smart team player.

EXPIRIENCE

Big Zkoop (May 2023 - Present)

At BigZkoop Software Company, I've had the privilege of contributing to numerous real-world projects, honing my skills as a fullstack software developer over the past 1 year and 6 months. My responsibilities encompass both frontend and backend development, where I leverage a diverse set of technologies to deliver robust, scalable solutions. I have hands-on experience in designing databases and have guided interns while leading several projects, ensuring their successful delivery in collaboration with cross-functional teams. My role has provided me with valuable insights into system architecture and project leadership, further enhancing my technical and mentoring skills.

PROJECTS

EDDWISE (Bigzkoop Project)

As part of the Eddwise project, Contributed primarily to frontend development for both the Learning Material System and the Marketing Web. Leveraging technologies such as React.js, Reactstrap, Redux Saga, React Data Table, and Next.js for Marketing Web, Focused on developing intuitive and responsive user interfaces and optimizing user experiences. Through collaborative teamwork and attention to detail, I played a key role in the development of a robust learning platform.

ZKOOP-ACADEMY (Bigzkoop Project)

Contributed to the design and implementation of the Zkoop Academy learning platform and the database design phase using an ER diagram for business scenario, implemented database architecture with Nest.js, TypeORM, and PostgreSQL, and developed essential CRUD APIs for question and answer management, as well as exam generation. Designed and built the frontend admin system using React.js, Redux Saga, Bootstrap, and Reactstrap, ensuring an intuitive and feature rich user interface. Employed best practices to ensure scalability and robustness, resulting in the creation of a user friendly learning platform.

SOFT-SKILLS

Quick and self learner

Critical thinking and excellent problem solver

Adaptability

Time management

Teamwork and collaboration

Patience

Self-Motivation

The ability to analyze complex technical information

EXTRA-CURRICULAR ACTIVITIES

Chief organizer of the wildlife society.

Member of chess team.

Member of astronomy society.

Member of the football team.

• Batch representative of the 1st year.

ADAMANT HRMS (Bigzkoop project)

ADAMANT HRMS was developed for a manpower agency stated in the USA to manage Human Resources of the company. The main requirements of the project was to create a system that can manage employees, manage clients that connected with the company, pay sheet and time sheets, etc. I have contributed as frond end developer. Used technologies was react, redux saga, tailwind, reactstrap.

E-commerce website for Chathuranga car sale (Final year group project)

The group project has done according to the agile methodology. The objective was to increase sales of the chathuranga car sale. Provide a helpful and easy to use web application for Chathuranga Car Sales to reach out to a substantial customer base, and instantaneously, make the Business-to-Customer relationship less complicated.
